LOOK **four**

Go for glam Use the colour of the sofa as your starting point. Various silver tones work beautifully in this room. It's important to go for different sheens and textures to prevent the room from looking flat.

Make a customised table Mask off the sides and top of the table so the paint colour is contained to just the tabletop. Spray-paint the top in light, even strokes in a well-ventilated area.

Make a wall display Hang three drops of wallpaper behind the sofa to give height to the room and create a focal point. (Most wallpapers are 53cm wide.) Follow the wallpaper hanging instructions on the packaging, or do an internet search for help – for example, see bristol.com.au. If you're in a rental you can use double-sided tape for a temporary solution. Or frame your favourite piece of wallpaper and hang the frame using 3M Command Hooks. ●
